

Experiment 6: touch, pwd, wget

Aim

To practice file creation, path display and downloading files from the internet:

- touch - Create empty files or update file timestamps
- pwd - Print Working Directory (show current path)
- wget - Download files from the web using HTTP/HTTPS/FTP

Procedure

1. Open Terminal.
2. Display current working directory:
`pwd`
3. Create an empty file:
`touch myfile.txt`
4. Verify the file was created:
`ls -l myfile.txt`
5. Download a webpage using wget:
`wget https://example.com`
6. List the downloaded file:
`ls -l index.html`

Sample Output / Results

pwd:

```
$ pwd
/home/kali
```

touch:

```
$ touch myfile.txt
$ ls -l myfile.txt
-rw-r--r-- 1 kali kali 0 Aug  3 10:20 myfile.txt
```

wget:

```
$ wget https://example.com
--2026-08-03 10:20:15--  https://example.com/
