

Experiment 7: cd, cp, ls

Aim

To practice directory navigation, file copying and listing:

- cd - Change Directory
- cp - Copy files and directories
- ls - List directory contents

Procedure

1. Open Terminal.
2. List contents of home directory:
`ls`
3. Change to Documents directory (create if needed):
`mkdir -p Documents`
`cd Documents`
4. Confirm current location:
`pwd`
5. Go back to home directory:
`cd ~`
6. Create a file and copy it:
`echo "Sample content" > original.txt`
`cp original.txt copy.txt`
7. List both files:
`ls -l original.txt copy.txt`

Sample Output / Results

ls:

```
$ ls
Desktop Documents Downloads Music Pictures ...
```

cd:

```
$ cd Documents
$ pwd
/home/kali/Documents
```

cp:

```
$ cp original.txt copy.txt
$ ls -l original.txt copy.txt
-rw-r--r-- 1 kali kali 15 Aug  3 10:25 copy.txt
-rw-r--r-- 1 kali kali 15 Aug  3 10:25 original.txt
```

```
kali@kali: ~/LinuxLab

Session Actions Edit View Help

zsh: corrupt history file /home/kali/.zsh_history
(kali@kali)-[~]
$ mkdir LinuxLab
mkdir: cannot create directory 'LinuxLab': File exists

(kali@kali)-[~]
$ cd LinuxLab

(kali@kali)-[~/LinuxLab]
$ pwd
/home/kali/LinuxLab

(kali@kali)-[~/LinuxLab]
$ echo "Hello Linux" > file1.txt

(kali@kali)-[~/LinuxLab]
$ cp file1.txt file2.txt

(kali@kali)-[~/LinuxLab]
$ ls
file1.txt  file2.txt  Folder1  Folder2
```
